Questions regarding close comparables? Contact us for details/samples.

If you do not see a Kinter match for what you are looking for, please contact our Sales Department for a prompt quotation.

\* Kinter's (K International, Inc.'s) parts are not manufactured by or connected in any way with siffron™.

"Comparable" is defined as "may not be identical to the siffron part, but generally corresponds to the siffron part and is suitable for the customer's intended use."

"Close Comparable" is defined as "generally corresponds to the siffron part and is suitable for the customer's intended use, but may be slightly different in dimensions, aesthetics, materials or function."

Questions regarding close comparables? Contact us for details/samples.

If you do not see a Kinter match for what you are looking for, please contact our Sales Department for a prompt quotation.

\* Kinter's (K International, Inc.'s) parts are not manufactured by or connected in any way with siffron™.

"Comparable" is defined as "may not be identical to the siffron part, but generally corresponds to the siffron part and is suitable for the customer's intended use."

"Close Comparable" is defined as "generally corresponds to the siffron part and is suitable for the customer's intended use, but may be slightly different in dimensions, aesthetics, materials or function."

\* Kinter's (K International, Inc.'s) parts are not manufactured by or connected in any way with siffron™.

"Comparable" is defined as "may not be identical to the siffron part, but generally corresponds to the siffron part and is suitable for the customer's intended use."

"Close Comparable" is defined as "generally corresponds to the siffron part and is suitable for the customer's intended use, but may be slightly different in dimensions, aesthetics, materials or function."

Questions regarding close comparables? Contact us for details/samples.

If you do not see a Kinter match for what you are looking for, please contact our Sales Department for a prompt quotation.

\* Kinter's (K International, Inc.'s) parts are not manufactured by or connected in any way with siffron™.

"Comparable" is defined as "may not be identical to the siffron part, but generally corresponds to the siffron part and is suitable for the customer's intended use."

"Close Comparable" is defined as "generally corresponds to the siffron part and is suitable for the customer's intended use, but may be slightly different in dimensions, aesthetics, materials or function."

Questions regarding close comparables? Contact us for details/samples.

If you do not see a Kinter match for what you are looking for, please contact our Sales Department for a prompt quotation.

\* Kinter's (K International, Inc.'s) parts are not manufactured by or connected in any way with siffron™.

"Comparable" is defined as "may not be identical to the siffron part, but generally corresponds to the siffron part and is suitable for the customer's intended use."

"Close Comparable" is defined as "generally corresponds to the siffron part and is suitable for the customer's intended use, but may be slightly different in dimensions, aesthetics, materials or function."

Questions regarding close comparables? Contact us for details/samples.

If you do not see a Kinter match for what you are looking for, please contact our Sales Department for a prompt quotation.

\* Kinter's (K International, Inc.'s) parts are not manufactured by or connected in any way with siffron™.

"Comparable" is defined as "may not be identical to the siffron part, but generally corresponds to the siffron part and is suitable for the customer's intended use."

"Close Comparable" is defined as "generally corresponds to the siffron part and is suitable for the customer's intended use, but may be slightly different in dimensions, aesthetics, materials or function."

\* Kinter's (K International, Inc.'s) parts are not manufactured by or connected in any way with siffron™.

"Comparable" is defined as "may not be identical to the siffron part, but generally corresponds to the siffron part and is suitable for the customer's intended use."

"Close Comparable" is defined as "generally corresponds to the siffron part and is suitable for the customer's intended use, but may be slightly different in dimensions, aesthetics, materials or function."

If you do not see a Kinter match for what you are looking for, please contact our Sales Department for a prompt quotation.

\* Kinter's (K International, Inc.'s) parts are not manufactured by or connected in any way with siffron™.

“Comparable” is defined as “may not be identical to the siffron part, but generally corresponds to the siffron part and is suitable for the customer’s intended use.”

“Close Comparable” is defined as “generally corresponds to the siffron part and is suitable for the customer’s intended use, but may be slightly different in dimensions, aesthetics, materials or function.”

Questions regarding close comparables? Contact us for details/samples.

If you do not see a Kinter match for what you are looking for, please contact our Sales Department for a prompt quotation.

\* Kinter's (K International, Inc.'s) parts are not manufactured by or connected in any way with siffron™.

“Comparable” is defined as “may not be identical to the siffron part, but generally corresponds to the siffron part and is suitable for the customer’s intended use.”

“Close Comparable” is defined as “generally corresponds to the siffron part and is suitable for the customer’s intended use, but may be slightly different in dimensions, aesthetics, materials or function.”

Questions regarding close comparables? Contact us for details/samples.

If you do not see a Kinter match for what you are looking for, please contact our Sales Department for a prompt quotation.

\* Kinter's (K International, Inc.'s) parts are not manufactured by or connected in any way with siffron™.

"Comparable" is defined as "may not be identical to the siffron part, but generally corresponds to the siffron part and is suitable for the customer's intended use."

"Close Comparable" is defined as "generally corresponds to the siffron part and is suitable for the customer's intended use, but may be slightly different in dimensions, aesthetics, materials or function."

\* Kinter's (K International, Inc.'s) parts are not manufactured by or connected in any way with siffron™.

"Comparable" is defined as "may not be identical to the siffron part, but generally corresponds to the siffron part and is suitable for the customer's intended use."

"Close Comparable" is defined as "generally corresponds to the siffron part and is suitable for the customer's intended use, but may be slightly different in dimensions, aesthetics, materials or function."
